

Ellison Test Certificate

The Ellison Test is the technical audit carried out as part of one of ADISA's ITAD certifications and is only available to those certified to the ICT Asset Recovery Standard 8 or the ITAD Essentials Certification. The test is carried out at a facility to verify the toolsets used for data sanitisation and includes a forensic assessment of data recovery on a range of storage media. If the test confirms that the product works correctly, is being used properly, and no data was recovered, then the media type is approved (see page 2 of this certificate for details).

Certification Number: AAC049.STD8 AAC049.ESS **Issue Date:** 11.11.2025

Version Number: v1.0 **Expiry Date:** 11.11.2028

Testing organisation and forensic analyst name:

ADISA CERTIFICATION LIMITED
JOSHUA SHEPPARD

Pass

RecycleIT
UNIT 2, SUMMIT WORKS, MANCHESTER
ROAD, BURNLEY, BB11 5HG,
UNITED KINGDOM

The results presented in this document are only valid within the forensic environment that was set up during the test. The full results are in the client report and available at the client's discretion.
